DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 23 is rejected under 35 U.S.C. 102(e) as being anticipated by Yamada et al., U.S. Patent # 6,085,071.

Figs. 1 and 2b of Yamada et al. disclose a duplexer having a dielectric filter comprising: resonators 103 –105 can be read as a plurality of dielectric resonators; in Fig. 1, circuit having inductors 111, 112, capacitors 113, 114 can be read as a main circuit wherein capacitors 113, 114 can be read as series coupling capacitors; circuit having capacitors 115, 116 can be read as an auxiliary circuit (see spec. col. 4, lines 1-24).

Allowable Subject Matter

Claims 24-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2817

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 6,696,903 B1, # 6,411,176 B1, and # 5,977,848 contain some limitations of the claimed invention.
